CHARACTERISTICS

- High precision.
- Manufactured using high quality materials for high strength.
- Cuts in both directions.
- Produce smooth edge cut.
- Longer die life.
- 3-step helical gear mechanism, resulting in stable operation, large cutting force, and low noise.
- Single disc electromagnetic clutch ensures agile and reliable operation.
- Electrical system is designed in accordance with IEC standard.
- Reliable safety system ensures operator safety.
- Available in different sizes.

<i>Technical specifications</i>	
<i>Model</i>	<i>BF-2000</i>
Max. Sheet Width	2000 mm
Max. Sheet length	4000 mm
Working Speed	10 - 20 pcs/min
Min. Sheet Size	550 x 900 mm
Top Nylon Roller Diameter	310 mm
Bottom Pressing Roller Diameter	240 mm
Working Table Size	2600 x 4500 mm for each side
Belt Quantity	10 belts each side
Wall Body Thickness	40 mm
Power	4.0 KW, IP-6
Machine Dimension	10000x2700x1400
Machine Weight	About 3000KG
