AUTOMATIC LAMINATOR

Model BZJ-L8/I300/I450/I600

DESCRIPTION

BZJ-L series, fully Automatic Flute Laminator is used for laminate litho printed surface onto corrugated board. Adopt the high-tech control system, supply the glue by automatically when the machine working, match with the recyclable gluing system, glue quantity can adjust according to the different of the paperboard, it makes the glue evenly on the paperboard, this system ensures glue saving with better lamination quality.

A/B/C/D/E/F/N flute capability, single and double corrugated board, easy operation, convenient maintenance, high speed, low noise, and high precision.

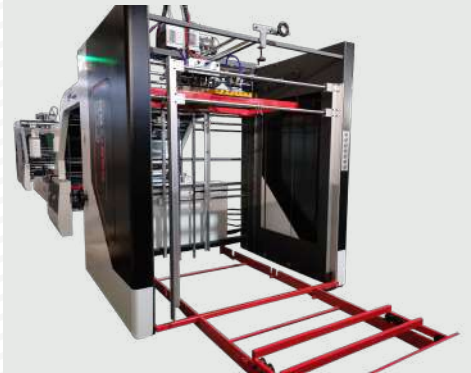

CHARACTERISTICS

- Front aligning device.
- Frequency converter control speed.
- PLC control whole machine.
- The double servo motor controls the bottom sheet feeding.
- Higher center design of gluing roller.
- Glue doctor roller with knurling surface.
- Automatic glue replenishment system can automatically compensate for lost glue and cooperate with glue recycling.
- Automatic feeder.
- Surface paper stacking height could be 1.5 m.
- Stacking table can lift automatically when feeding.
- Automatic counter.
- Synchronous belt for transmitting, can keep high laminating precision.
- Electric Drive.
- Full-function electronic control system, using human-machine interface and PLC program model display, can automatically detect operating conditions and work records.

<i>Technical specifications</i>			
<i>Model</i>	<i>BZJ-L8-1300</i>	<i>BZJ-L8-1450</i>	<i>BZJ-L8-1600</i>
Max. Speed	6000 Sheet/Hour		
Max. Sheet Size	1300 x 1250 mm	1450 x 1250 mm	1600 x 1250 mm
Min. Sheet Size	400 x 400 mm		
Top Paper Grammage	150 - 450 GSM		
Bottom Sheet Grammage	Over 350 GSM		
Power	13 KW
