# Plate Cleaning Machine SG1600S-2

## OVERVIEW

The SG1600S-2 Plate Cleaning Machine is a professional automated equipment specifically designed for processing flat materials. Primarily designed for various printing plates with grooves or gaps, it performs integrated cleaning and drying operations, achieving integrated cleaning and drying operations. It enables efficient removal of surface dust, oil stains, water marks, and debris with rapid drying, providing substrates that meet high cleanliness standards for subsequent processing procedures.

# Medium Fluter

## PN - MF

PNSHAR

## Description

PN-MF Medium Fluter Tester is easy to use, precise temperature control, adjustable pressure range, working temperature can be adjusted, vertical design simplifies sample feeding, precise temperature control and adopt PID algorithm, fast response and high accuracy, gear adopts precise manufacture process.

## Standars

GB/T 2679.6, QB/T 1061, ISO 7263, TAPPI T809

| Specification | |
|---|---|
| Power | AC220V, 50Hz |
